RECONCILIATION OF EPRA NAV

EPRA adjustments add back the liabilities related to:

- Fair value of interest rate derivatives
- Deferred tax

Triple adjustments subtract the liabilities related to:

- Fair value of interest rate derivatives
- 60% of the deferred tax
- Fair value of the companies' debt portfolio (e.g. if current interest rates are significantly lower than a companies' debt portfolio this represents a negative value as the company is paying more interest than current market prices)
